DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. Specification embodiment 1, drawn to a liquid crystal module in which the semiconductor device is provided so as to face a liquid crystal panel (Figures 1 through 3b)
- II. Specification embodiment 2, drawn to a liquid crystal module in which the semiconductor device, liquid crystal panel, and printed wiring substrate are mounted in flat (Figures 4 through 5b)
- III. Specification embodiment 3, drawn to a liquid crystal module in which the end portion of the flexible substrate is folded in substantially a U-shape before mounting it to the lower glass substrate of the liquid crystal panel (Figures 6a through 8c)
- IV. Specification embodiment 4, drawn to a liquid crystal module in which the flexible substrate is bonded to the liquid crystal panel before folding the end portion to form the U-shaped part (Figures 9a through 10c)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
